

Daniil Mishin

JUNIOR CYBERSECURITY SPECIALIST

mishindaniil365247@gmail.com

Tashkent, Uzbekistan

github.com/rochelvi

SUMMARY

Cybersecurity engineer with 3+ years of hands-on experience in system administration, where managed Windows Server and Linux environments, Active Directory, network infrastructure, and virtualization. Graduate of School 21 Tashkent cybersecurity program. Builds and operates a personal lab (Proxmox, EVE-NG, Wazuh) — brings security awareness to every infrastructure task. Comfortable with scripting (Python, Bash, PowerShell) and automating routine admin work.

EXPERIENCE

System Administrator

2022 – 2025 · 3 yrs

ИП ООО «TNG LOGGING ASIA» · Tashkent

- › Administered Windows Server (2016/2019) and Ubuntu/Debian servers; managed AD, GPO, DNS, DHCP for 50+ users
- › Set up and maintained Hyper-V and VMware virtualization clusters; handled VM provisioning and snapshot management
- › Configured and maintained network equipment (MikroTik, Cisco); managed firewall rules, VLANs, VPN tunnels
- › Implemented and monitored backup solutions; ensured system uptime and performed incident response
- › Wrote PowerShell and Bash scripts to automate user provisioning, log rotation, and patch deployment

Cybersecurity Intern

Jan 2026 – Apr 2026

School 21 (HOY «SHKOLA 21») · Tashkent

- › Deployed and hardened server infrastructure: Vaultwarden on Docker + Nginx Proxy Manager + automated backups
- › Configured Wazuh SIEM and Suricata IDS on Proxmox; wrote detection rules from live pcap analysis
- › Designed enterprise network topology (NGFW + WireGuard VPN + IDS + endpoint protection)
- › Configured КриптоПРО NGate: GOST TLS, certificate generation, SCP key transfer, Windows CSP integration
- › Automated Wazuh agent deployment and removal across 50+ hosts using Python + paramiko over SSH

Interns Buddy

Aug 2026 – now

School 21 (HOY «SHKOLA 21») · Tashkent

- › Helping Interns to adapt to new tasks and environment
- › Developing exam system for intern application and mid/final scoring

Junior Cybersecurity Specialist

Sep 2026 - now

AVO Bank · Tashkent

- › Maintaining Information Security services
- › Setting up high availability (HA) for this services
- › Collaborating with my team

TECHNICAL SKILLS

OS & Servers · Windows Server 2016/19/22/25 · Ubuntu/Debian/Arch · CentOS Virtualization · Proxmox · Hyper-V · GNS3 · Docker · EVE-NG · VMware Workstation Networking · MikroTik · Cisco IOS · VLANs · VPN/WireGuard · IPsec	Directory & Services · Active Directory · GPO · DNS/DHCP · Zabbix · Nginx · Cloudflare Scripting · Python · Bash · PowerShell · Git Information Security · Kaspersky Security Center / Endpoint Security · MITRE ATT&CK · Wazuh SIEM (XDR) · Suricata IDS
---	--

SOFT SKILLS

Problem Solving · Self-learning · Communication · Time Management · Attention to Detail · Technical Documentation · Team Collaboration

EDUCATION & CERTIFICATIONS

School 21 — Cybersecurity Program	CompTIA Security+	eJPT
HOY «SHKOLA 21», Tashkent · 2026	Planned · Priority #1	Planned · Offensive track

PERSONAL LAB

- › Proxmox hypervisor running EVE-NG (Cisco/MikroTik/Juniper topologies), Wazuh SIEM, and Suricata IDS for continuous practice
- › Vaultwarden self-hosted deployment: Docker, Nginx Proxy Manager, automated SQLite backups (Bash + Python)
- › Mass SSH automation: paramiko-based scripts for fleet-wide agent deployment/removal across 50+ Ubuntu hosts
